Ms. Marja Äikäs

Before starting a business of my own I worked as a professional in the communications sector, as a reporter and in an advertising agency. I established an advertising agency of my own in 1988. Now there are two permanent employees in addition to myself. We offer our core expertise and services of our cooperation partners as subcontracting work.

Mainos-M is a marketing communications planning agency based in Lahti.

Our strong competitive edges include: long experience, creativity, good knowledge of the corporate culture and extensive knowledge of advertising production. We work ambitiously and with all our heart.

We respond to the challenges of marketing communications by creating and realizing a marketing plan based on the customer's needs.

We are capable of producing additional value for companies, their services and their products using both informative means and images in the minds of customers, independent of the sector and marketing environment.

Our objective is producing sustainable tools for advertising to support business of our customers.

In our work, creativity means efficiency, functionality and professional expertise. We assist our customers in separating themselves from their competitors, improving their reputation and their competitive edge in the market.

Our services include

- \* Compilation of marketing plans
- \* Visualization of products and services for marketing
- \* Constructing, developing and launching marketing for product families
- \* Creating, developing and strengthening brands & corporate image

Our cooperation partners

We use our competent and reliable cooperation partners in realizing our designs, such as IT service companies, printing houses, copy and image processing plants, translators, photographers. AV and video professionals.

That is, everything you need to realize your advertisements!
