

Häme Happy Homes

Private Social and Health Care

Established in 1998 first as a cooperative society is now limited company.

We produce home care services and assistance in taking care of one's everyday tasks quickly and flexibly, based on the needs of our customers.

The services and care are planned and realised in cooperation with the customer, his or her family and a doctor. The family members are an important resource, and they are encouraged to participate in the activity and care by any means possible.

Home Care

Häme Happy Homes offers individual, high-quality home care services for the elderly. Our home care services include home nursing, home care service and assistance in taking care of one's everyday tasks.

The home nursing service refers to, for example, measuring blood sugar and blood pressure levels, taking blood tests, caring for wounds and giving injections. The home care service refers to, for example, assistance in cleaning, cooking, medication as well as basic care services. The assistance in taking care of one's everyday tasks may refer to, for example, going to the store, pharmacy, doctor's, etc.

Home from Hospital

We offer a Home from the Hospital service aiming at offering a safe way to return from institutional care to home care as well as continuing of the home care so that the customer will manage in the home. An example case: An elderly person has undergone cataract surgery, and will need assistance in getting back home, someone to give eye drops and to monitor his or her condition.

The service includes taking the customer home from the hospital as well as assisting him or her in everyday chores and other necessary tasks, depending on how much assistance the customer needs (cooking, cleaning, going to the store and pharmacy, taking blood samples).

Jalavakoti

Jalavakoti is a service centre for the elderly whose services are purchased from us by the municipality of Hollola. A workgroup of the municipality decides upon who will be able to move into the Jalavakoti whenever there is a vacancy.

Jalavakoti offers a home-like living environment for those elderly persons who are so frail that they are no longer able to live in their own home with the help of the support services. Jalavakoti offers basic and special service for all the needs of the residents 24/7. In Jalavakoti, each resident has a private one-bedroom apartment where they can be in peace whenever they like. Shared meals offer an opportunity for social interaction every day. Other shared activities are also arranged, such as exercising, outdoor activities, trips and parties.
