

## About our company

**Flamelle** factory is in South-Estonia, Võru, Pikk street 15A.

**Flamelle** has been manufacturing workclothes since 1997. We started having only 4 tailors, producing workclothes for Estonian market. For now, we have 15 workers and during high season we also cooperate with other manufacturers close to us by sending part of our half-finished work for them to manufacture.

Our aim is to fulfill our customers wishes and requests.

In addition to achieve quality in today's competitive enterprise-community, advertising is also necessary. A company needs to leave a print in people's memories in order to grow success. That is why companies come to us and order habiliments used in building, transport, medicine, forestry, service etc, for their workers. It is also possible to print or embroidery logos, that would function as an ad. Ordering from us, companies and people have a chance to differ.

Besides producing habiliments and selling different leisure-time clothes, we make special logos and ad-prints according to clients will. You can also order various advertising products, such as pens, calendars, t-shirts, mugs, calculators, keychains etc, with different logos. According to your order, it

will be filled in a short amount of time! Here we help you choose between different products, selecting out a relic that fits with your company's work and wishes. We offer different options and technology for making logos, considering a product's type of character.

You can meet with lots of product examples and catalogs here in Flamelle, plus – the prices are really reasonable!

You should always turn to Flamelle, if you have a wish to own something special or idiosyncratic or if you want to provide your workers with comfortable and practical clothes at work. We will go through your ideas and our chances together and find a convenient solution to your wishes!

We would like to find partners in this field – we can produce different workwear or other textile products. As being a small company, we can be flexible and fast with different orders.
